## Exploration Update

In response to shareholder questions received during proxy voting communications for the upcoming EGM on 9<sup>th</sup> July 2021. PepinNini Minerals Ltd (PNN, the Company) reports that the Company is on track to commence exploration activities in its two key projects in Australia and provide the following update on activity.

### Eyre Peninsula Kaolin Project

The exploration strategy is to complete all statutory regulatory processes before licences are granted. This allows the Company to negotiate land access with local landowners and traditional owners before the exploration licenses are granted.

The work carried out and continuing:

- A regional reconnaissance survey, completed in early May, which confirmed location of two historical kaolin occurrences: North Deposit and Couлта. Samples (locations Figure 3) have been submitted to the laboratory (Bureau Veritas in Adelaide) and results are pending.
- Successful engagement with regional leadership and local government authorities.
- Community engagement plan is completed and contact with key landowners has been initiated to negotiate land access.
- Recruitment and drilling services agreement in progress.
- Continue drill target refinement and interpretation of exiting geological data

PepinNini is following statutory processes and is well positioned to start exploration activities as soon as the licences are granted. An indicative timeline (Figure 1) below with licences expected at the end of August precluding any unforeseen regulatory issues surfacing.

Musgrave Project – APY Lands

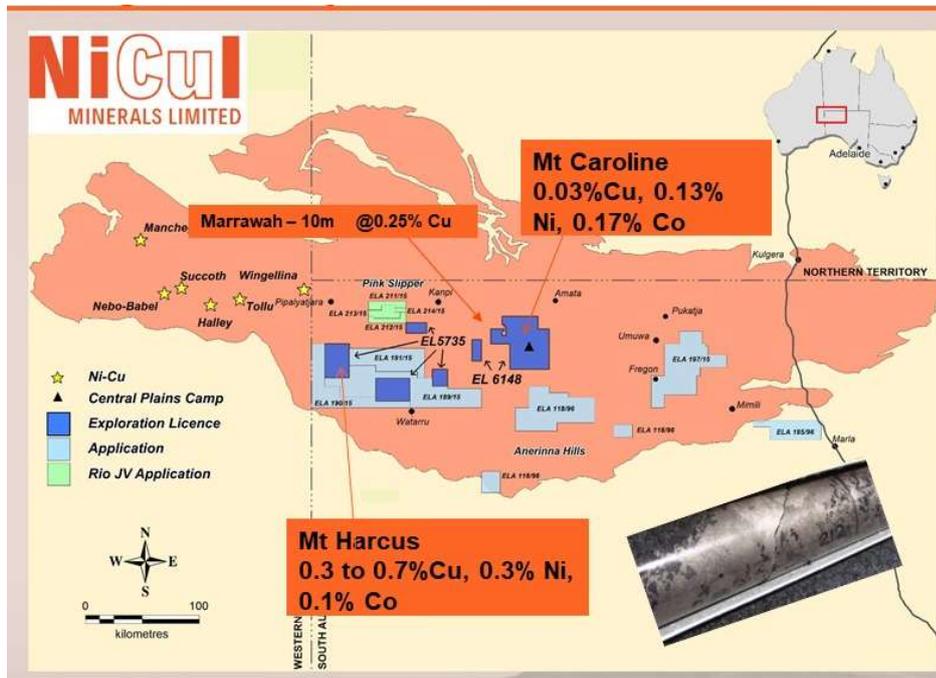

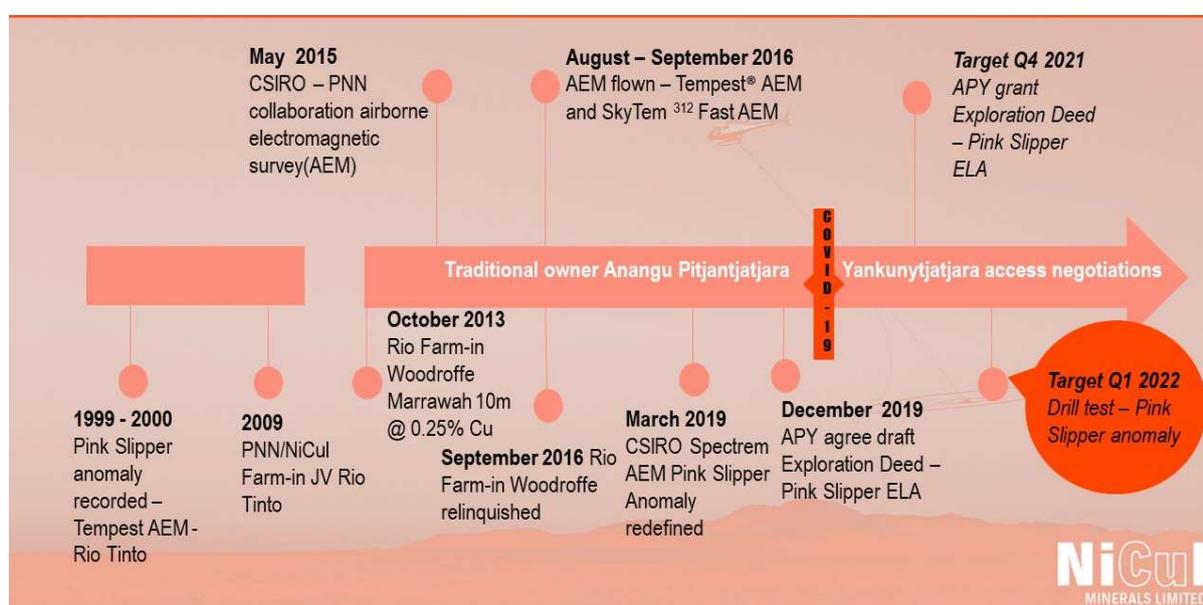

Figure 4 Musgrave Project, APY Lands South Australia

Exploration in the APY lands where the Company's Musgrave Project is located requires approval of an Exploration Deed with the custodians of the land, Anangu Pitjantjatjara Yankunytjatjara (APY) before an EL is granted by the government. Delays due to COVID-19 restrictions has affected this process.

Early in May an initial meeting was held in Adelaide with members of the APY Executive Board and last week a further meeting was held with the APY Anthropology and Legal Teams to plan for a Community Consultation meeting on July 22<sup>nd</sup>. The Community Consultation meeting is an important step as part of the statutory process towards grant of an Exploration Licence.

Figure 4 show the project location and results from previous exploration carried out since 2006.

An indicative time line for the project is outlined in Figure 5 below.
