The Pink Slipper ELA forms part of a larger area held under application since 1982 by Delta Exploration and Rio Tinto. PepinNini's wholly owned subsidiary NiCuL Minerals Ltd has a farm-in and joint venture agreement (FJVA) with RioTinto Exploration Pty Ltd; (Rio Tinto) for the larger area of 4 ELAs covering 615km² which includes the Pink Slipper ELA)(Highlighted in green on Figure 2 below). PepinNini is the operator on behalf of the project participants for the FJVA ELAs. The Pink Slipper geophysical target was first recognised in 2000 and recently re-flown by CSIRO in March this year, (Figure 1). PepinNini is targeting Ni-Cu sulphide mineralisation at the shallow, well defined Pink Slipper electromagnetic anomaly.
